- Designation- Technical Support Engineer
- Duration- Feb 2022 to Aug 2022
- Location- Bangalore (WFH during Covid-19)
- Roles & Responsibilities-
  1) Getting issues raised by clients and analyzing solutions and giving appropriate support via chat.
  2) Creating cases based on necessary situations.

2) Company – Vritika Technologies

- Designation- Web Designer at Vritika Technologies
- Duration- 3 Months (July 2020 to October2020)
- Location- Belagavi
- Roles & Responsibilities-
  1) Modifying the existing websites according to Client's requirement.
  2) Creating Website from Scratch as per the requirement.

ACADEMIC PROJECT

1. **Project Title**: "CHILD SECURITY ALERTSYSTEM".
Description: RFID based child security system for a school bus which will help the parents and the school to keep track of the child's location. Every student's entry and exit activities will be informed to the parents by generating SMS.

2. **Project Title**: "BUSTRACKING".
Description: This project aims to build an Android application that automates all the aspects related to the college bus arrival. At specific pickup point the application sends SMS to students who are supposed to board the bus at the next pickup point. The message is received within the restricted range.

INTERNSHIP

Organization: Scalebytes, Belagavi

Duration: 20/06/2018 to 20/08/2018

Key learnings: I have learnt the concepts of Big Data Technology and hence applied the concepts on few data sets like student details and executed the queries.

Place – Belagavi   SIGNATURE
